

Start Course

Narration

The 4 modules in this course build on one another, however, you can take each module separately, if you wish.

- In Module 1, we look at how to write translatable content, and at how to structure a document with translation in mind.
- Module 2 explains how to prepare terminology and translation memory databases using the Trados Studio translation memory tool.
- In Module 3, we focus on managing a translation project in Trados Studio.
- And finally, in Module 4, we look at what you can do to check translation quality, and how to finalize your translation project.

To start a module, click on the corresponding link.

Screen

The screenshot displays the course landing page for 'TM for technical writers'. At the top, a teal header contains the course title and a welcome message: 'Welcome to TM for technical writers!'. Below this, a navigation bar features four buttons: 'Introduction', 'Start Course' (highlighted in orange), 'Get Certified', and 'Learn More'. The main content area, titled 'Course content', is divided into two columns by a large vertical pencil graphic. On the left, a woman holding a folder is shown next to a 'Click the pencil to learn more' link. The right column lists four modules, each with a list of topics: Module 1 (Translatable content) includes 'Writing for translation' and 'Preparing a document for translation'; Module 2 (Translation resources) includes 'Using Trados Studio to create: Terminology databases' and 'Translation memory databases'; Module 3 (Translation projects) includes 'Creating a Trados Studio project' and 'Handling external translations'; and Module 4 (Finalizing the project) includes 'Quality assurance' and 'Final steps'. At the bottom, a teal bar shows 'TM for technical writers: Start course' and 'Course: 1% completed', followed by navigation arrows.
